

Paleobiology

(ISSN 0094-8373)

Volume 37

Number 3

Summer, 2011

CONTENTS

Articles

- Does morphological variation buffer against extinction? A test using veneroid bivalves from the Plio-Pleistocene of Florida
Sarah E. Kolbe, Rowan Lockwood, and Gene Hunt 355
- Comparing the differential filling of morphospace and allometric space through time: the morphological and developmental dynamics of Early Jurassic ammonoids
Sylvain Gerber 369
- A ubiquitous ~62-Myr periodic fluctuation superimposed on general trends in fossil biodiversity. II. Evolutionary dynamics associated with periodic fluctuation in marine diversity
Adrian L. Melott and Richard K. Bambach 383
- Early and Middle Triassic trends in diversity, evenness, and size of foraminifers on a carbonate platform in south China: implications for tempo and mode of biotic recovery from the end-Permian mass extinction
Jonathan L. Payne, Mindi Summers, Brianna Rego, Demir Altiner, Jiayong Wei, Meiyi Yu, and Daniel J. Lehrmann 409
- A geographic test of species selection using planktonic foraminifera during the Cretaceous/Paleogene mass extinction
Matthew G. Powell and Johnryan MacGregor 426
- Paleolongitudinal estimates for paleocontinents derived from interplate distances based on Late Ordovician bivalves
William F. Schmachtenberg 438
- Landlubbers to leviathans: evolution of swimming in mosasaurine mosasaurs
Johan Lindgren, Michael J. Polcyn, and Bruce A. Young 445
- Do convergent ecomorphs evolve through convergent morphological pathways? Cranial shape evolution in fossil hyaenids and borophagine canids (Carnivora, Mammalia)
Zhijie Jack Tseng and Xiaoming Wang 470
- Constraint and adaptation in the evolution of carnivoran skull shape
Borja Figueirido, Norman MacLeod, Jonathan Krieger, Miquel De Renzi, Juan Antonio Pérez-Claros, and Paul Palmqvist 490
- On taxonomic membership
Bruce H. Wilkinson 519
- Determinants of species abundance in the Quaternary vertebrate fossil record
Samuel T. Turvey and Tim M. Blackburn 537
